Singapore Exchange To Resume ETF Trades Tuesday

220 字

2001 年 9 月 15 日 11:34

Dow Jones International News

DJI

英文

(c) 2001 Dow Jones & Company, Inc.

SINGAPORE -(Dow Jones)- The Singapore Exchange said Saturday it will resume trading of its four U.S.-based Exchange Traded Funds, or ETFs, on Tuesday, September 18, pending the U.S. stock market re-opening on Monday, September 17.

The ETFs are **S&P500** SPDRS, DJIA DIAMONDS, **S&P500** Index Fund, and iShares Dow Jones U.S. Technology Sector Fund.

The stock market will also, in conjunction with a number of other securities exchanges throughout the world, observe three minutes of silence from 0600 GMT Monday for the victims of the terrorist attacks on the U.S.

U.S. stock markets plan to resume trading on Monday, six days after a terrorist attack destroyed the World Trade Center and forced the closure of the New York financial district.

The halt in trading will be the longest since 1933.

Separately, the Singapore Exchange said the SGX Nikkei 225 and 300 contracts traded in Singapore will start trade at 2355 GMT Sunday (0755 Monday Singapore time) and 2400 GMT respectively, in line with normal opening hours on the Tokyo stock market.

Trades for these contracts had started after a 30 minutes delay following the attacks in the U.S.

Dow Jones Corporate Filings Alert

FF

英文

(Copyright (c) 2001, Dow Jones & Company, Inc.)

ISSUER: EATON VANCE CORP.

SYMBOL: EV

WASHINGTON -(Dow Jones)- Eaton Vance Management plans to advise a fund under the Eaton Vance Mutual Funds Trust, according to a filing with the Securities and Exchange Commission.

The proposed Eaton Vance Equity Research Fund will seek long-term capital appreciation by investing in a diversified portfolio of equity securities.

According to the filing last Friday, the fund will invest at least 65% of its total assets in a broadly diversified selection of common stocks, maintaining investments in all of the market sectors represented in the Standard & Poor's 500 Composite Stock Price Index.

The filing said particular stocks owned by the fund won't mirror the

**S&P500**; the fund may also invest up to 10% of its assets in unaffiliated investment companies.

Although the fund invests primarily in domestic securities, it may invest up to 25% of its assets in foreign securities, the filing said.

A team of analysts supervised by Walter A. Row III will manage the portfolio. Row has been a senior analyst and an employee of Eaton Vance since June 1996 and is a vice president of the firm.

The fund will carry a maximum front-end load fee of 5.75%. The management fee will be 0.65%, with a 0.25% distribution fee and a 0.5% fee for other expenses.

For general accounts, the minimum initial investment will be \$1,000 and \$50 for subsequent investments, the filing said.

Eaton Vance Management is based in Boston and has been managing assets since 1924 and managing mutual funds since 1931. Eaton Vance and its subsidiaries currently manage \$50 billion on behalf of mutual funds, institutional clients and individuals.

Capital Markets Report

CM

英文

(c) 2001 Dow Jones & Company, Inc.

A Dow Jones Newswires Column

NEW YORK -(Dow Jones)- Daylight Savings Time.

It's a wonderful thing for most of us. On the way home at night, we don't need to turn on the car headlights. Some of us actually will be able to get in a quick nine holes after work. I say that every year when the clocks spring forward, but somehow it never happens.

Work is indeed the curse of the golfing class.

Daylight savings time also means we are an hour closer to the end of the current bear market (DJIA sanctioning, or not). That's, of course, if you believe the bear market will be over before 2 a.m. on the last Sunday during this October. If you keep telling yourself something is true, even when it isn't, it either becomes the truth if enough people believe you, or you're gonna be in an awful lot of hot financial water.

At present, I would recommend those bulls out there to stock up on burn cream.

While everyone and his brother is reviewing the first quarter, I will make my look-back as painlessly brief as possible. The first quarter of 2001 will not be looked upon as an "oldie, but goodie" if you own stocks. As the table below indicates, the red ink flowed profusely in the equities markets.

Interestingly enough, this occurred in the midst of an almost unprecedented sympathetic Federal Reserve policy, where short rates were cut 150 bps, 2/3 of which came in the first third of the quarter.

We all understand that it takes a while for interest rate changes to filter through to the real economy. But financial markets consistently buy the rumor, so to speak. I think the first quarter market action shows this is quite symptomatic of how seriously people are taking the recent and prospective earnings and revenue declines. This bear market isn't a flash in the pan. It's the real McCoy.

DJIA						
S&P500	Nasdaq	NYSE	Wilshire 5000			
Dec 29	10786.85	1320.28	2470.52	656.87	12175.88	
Mar 30	9878.75	1160.33	1840.26	595.67	10645.85	
Change	-908.10	-159.95	-630.26	-61.20	-1530.03	
%Change	-8.4	-12.11	-25.51	-9.32	-12.57	

The Treasurys market hasn't been exactly dormant over the past three months. Here are some interesting statistics on the movement in yields and yield spreads:

	12/29	3/30	Change	Qtr High	Qtr Low	Change (bps)
						(bps)
3Mo	5.88	4.29	159	5.88	4.22	166
6Mo	5.70	4.09	161	5.70	4.09	161
12Mo	5.36	4.09	127	5.36	4.09	127
2Yr	5.10	4.18	92	5.10	4.18	92
5Yr	4.97	4.56	41	5.03	4.42	61
10Yr	5.11	4.92	19	5.31	4.74	57
30Yr	5.44	5.46	2	5.69	5.27	42

Notice any patterns? They shouldn't be surprising.

The 150-bp decline in the Fed funds target rate, combined with the relatively stable inflation picture, pushed the shorter end of the curve lower, while the longer end wound up closer to unchanged. The volatility in the 10-year is more a function of forces external to the Treasury market. These include rate-lock hedging transactions, swap-related buying and selling and duration extensions in MBS.

#### **Yield spreads changes within the Treasury curve**

(12/29 - 3/30; All changes shown in bps)

	3Mo	6Mo	12Mo	2Yr	5Yr	10Yr	30Yr
3Mo	-1.7	32.4	67.4	118.3	141.1	161.5	
6Mo		33.9	69.1	119.9	142.8	163.1	
12Mo			35.0	86.0	108.8	129.1	
2Yr				50.9	73.7	94.0	
5Yr					22.9	43.2	
10Yr						20.3	

Once again this isn't surprising. The shorter maturities fell the most, yield-wise. The steepening in the curve is a natural extension of this.

What's next? In a nutshell, as long as the Fed continues to keep the needle on ease, the stock markets remain bearish, the dollar strong and inflation at bay, the yield curve will be biased toward steepening. This is basic Econ 101. Right now, all of those scenarios seem pretty reasonable to me - on April Fools Day.

A look at intermarket spread activity during the first quarter will be published later this week.

Just in case anyone's interested, the most popular explanation of the origin of April Fool's Day I could dig up dates back to 16 Century France, where the New Year, which was originally observed on April 1, was shifted to Jan. 1. There were some people however, who didn't get the message, or didn't believe the change was official, and continued celebrating the new year on April 1. These people became known as the April Fools.

#### **U.S. Treasury Rich Cheap Analysis 3/30**

##### **Yield Spread (in bps)**

	3Mo	6Mo	12Mo	2Yr	5Yr	10Yr	30Yr
3Mo	xxx	-19.7	-19.5	-11.1	26.8	63.4	117.0
6Mo	-1.4	xxx	0.1	8.6	46.5	83.1	136.7
S 12Mo	1.1	2.3	xxx	8.4	46.4	82.9	136.5
T 2Yr	1.3	2.1	1.5	xxx	37.9	74.5	128.1
D 5Yr	1.6	2.1	1.9	2.0	xxx	36.6	90.2
10Yr	1.9	2.4	2.2	2.4	1.4	xxx	53.6
30Yr	2.1	2.5	2.4	2.7	2.2	2.2	xxx

Grid Explanation: The figures in the upper part of the grid (above and to the right of xxx) show yield spreads between active, or on-the-run, U.S. Treasury issues. The figures in the lower portion show the difference between the current spread and its three-month average, all divided by the three-month standard deviation of the spread. The resulting measure is the number of STDs over or under the three-month mean of the spread.

#### **U.S. Treasury Yields 3/30**

##### **1Day Change 1Week Change 1Mo Change**

3Mo	4.185	-4.9	0.0	-54.7
6Mo	4.090	-7.0	-26.9	-60.0
12Mo	4.091	-8.2	-5.6	-39.3
2Yr	4.176	-9.9	-4.7	29.1
5Yr	4.555	-8.6	7.6	-16.6
10Yr	4.921	-7.8	12.4	-2.6
30Yr	5.457	-4.2	15.9	8.5

CME Volume, Open Interest, Electronic Trading Set Records

263 字

2001 年 3 月 15 日 15:20

Capital Markets Report

CM

英文

(c) 2001 Dow Jones & Company, Inc.

CHICAGO -(Dow Jones)- Trading volume on the Chicago Mercantile Exchange Wednesday set a new record for the exchange, with 2,245,027 contracts changing hands, the CME said Thursday.

In addition, the CME notched a number of other daily records including exchange-wide open interest and electronic trading volume on the CME's GLOBEX2 system.

The new daily volume record for the CME replaces the one established Feb. 4, 1994 of nearly 2,191,819 contracts.

Record GLOBEX2 volume of 423,804 contracts marked the first time volume on the system has exceeded 400,000 contracts, just three weeks after it broke through the 300,000 level for the first time. The volume soared past the March 13 record of 364,284 contracts.

Open interest of 11,692,054 positions surpassed Tuesday's record of 11,551,925 positions. Several of the exchange's largest products set new record open interest levels, including Eurodollar futures, with 4,338,283 positions, Eurodollar options on futures with 4,925,756 positions, and **S&P500** futures with 572,426 positions.

The GLOBEX2 volume was fueled by a second consecutive record day for trading in the CME's E-mini equity index futures. March 14 volume in E-mini S&P 500 futures was 183,181 contracts, compared with 175,420 the previous day. E-mini NASDAQ 100 futures reached a record 146,423 contracts, besting the March 13 record of 144,763.
